### Reconnect

#### What pluggz do...

Have you ever wondered why it feels so good to walk barefoot on grass or sand?

It's because we are all standing on a natural energy source – the earth. When we walk barefoot on the earth we absorb the earth's energy in the form of electrons.

These electrons enable us to get grounded – and being grounded makes us feel good.

### Grounding

#### How pluggz work...

Each pair contains black plugs made from a custom carbon and rubber compound that sit under a weight bearing part of our feet ensuring electrical contact between us and the earth.

These plugs are designed to conduct a flow of free electrons from the earth to our bodies. This proprietary technology allows us to get grounded when we walk on grass, sand, soil – or even concrete.

### Benefits

#### How pluggz make you feel...

Most shoes create a barrier to grounding. Not *pluggz*. They help ground us. People who wear *pluggz* have reported that they get the same feelings of well-being as when they walk barefoot. Some feel more balanced, others more refreshed and revitalized, others happier.

It also feels good knowing that a portion of sales go to organizations dedicated to enhancing the well-being of people of all ages.
